

Clever Badges

Give students access to a world of digital learning with the flash of a badge. It's not magic – it's a secure Clever Badge.

“ Before Clever, teachers wouldn't get on technology. Different software and logins soaked up valuable class time. Now it's as easy as “Go get your Clever Badge”, and they have their passport to all their software.”

College Jones, Principal
Carroll County Schools, GA

Instant, secure access for any student

- Fast and fun logins - no typing necessary
- Start lessons immediately and avoid login delays
- A safer alternative to sharing or posting passwords
- Student data stays safe and private with encoded data tokens

How Clever Badges works

1. **Choose your devices and/or browsers:** Clever Badges are compatible with Chromebooks, iOS devices, Android and Windows devices. They also work with Chrome, Firefox, Safari, Edge, and Internet Explorer browsers.
2. **Select users:** Select the schools and students who should log in with Badges.
3. **Review built-in security options:** Older students can use Badges with a unique pin for secure two-factor access. Plus, Badges are voided each year to reduce cybersecurity risks.
4. **Print your Badge:** Clever will automatically send you a file with Badges split up by school and grade level. Or, print them directly on your student-ID cards.
5. **Reset in a snap:** Teachers, schools tech leads, and admins can void and regenerate backup login codes for misplaced badges.
